Summary

Software Engineer with 2+ years of experience building backend services, REST APIs, system integrations, and full-stack web applications. Hands-on experience with Java/Spring Boot, C#/.NET, PostgreSQL, SQL Server, Docker, and CI/CD (Jenkins, GitHub Actions). Experienced in applying AI-assisted development and LLM-based automation to real-world workflows, and interested in building scalable backend systems.

Education

Instituto Tecnológico de Tijuana, BS in Computer Systems Engineering – Tijuana, Mexico **Aug 2021 – Dec 2025**

San Diego Global Knowledge University, Full Stack Development Immersive Certificate **Jun 2022 – Dec 2022**

Experience

Software Engineer, ITJ – Tijuana, Mexico **Mar 2026 – Present**

- Develop server-side business logic and database queries for enterprise CRM solutions, translating requirements into tested, production-ready features.
- Build and configure customer-facing web portals for enterprise CRM clients, setting up page layouts, reusable components, navigation, branding, and access permissions for external users.
- Contribute to an internal HR mentorship platform (mentor/mentee flows) built with Next.js, working across frontend and backend components to implement and refine application functionality.
- Lead the evaluation of AI coding tools and the roadmap for a team-wide AI-assisted development pilot, building on daily use of Claude Code for implementation, testing, and code review.

Software Developer Junior, RSI México – Tijuana, Mexico **Apr 2025 – Mar 2026**

- Built backend modules and REST APIs for a field service management system with C# and ASP.NET Web API, including spare-part recommendation logic, dynamic document generation, and third-party integrations.
- Designed AI-driven automation workflows using n8n, orchestrating API integrations and LLM-based logic to streamline business operations.
- Configured CI/CD pipelines using Bitbucket Pipelines, Jenkins, and PowerShell to automate C#/.NET deployments to IIS.
- Containerized and deployed backend services on a VPS using Docker Compose, configuring secure external access.
- Optimized service report generation, reducing processing time by 90% through standardized data structures.

Software Development Intern, RSI México – Tijuana, Mexico **Jul 2024 – Apr 2025**

- Built and maintained internal web applications using ASP.NET, C#, and SQL Server supporting administrative and operational processes.
- Developed Android application features in Java, implementing functionality based on operational requirements.

Projects

Nido – Full-Stack Notes App | Java, Spring Boot, PostgreSQL, React/TypeScript

- Built a Spring Boot REST backend with Spring Security and JWT authentication: short-lived access tokens held in memory, hashed refresh tokens delivered in httpOnly cookies, and CSRF protection.
- Designed the data model (users, spaces, nested topics, notes), storing block-based note content as ordered JSONB documents in PostgreSQL, with versioned schema migrations managed by Flyway.
- Containerized the backend with a multi-stage Dockerfile running as a non-root user, and automated image publishing to GitHub Container Registry with GitHub Actions.
- Repository: github.com/EddieReynosoR/nido

Skills

Languages: Java, C#, Python, SQL, JavaScript, TypeScript
Backend: Spring Boot, Spring Security, .NET, ASP.NET Core, REST APIs, JWT, Clean Architecture
Databases: PostgreSQL, SQL Server, Flyway
Cloud & DevOps: AWS, Docker, Linux, CI/CD, Jenkins, GitHub Actions, Bitbucket Pipelines
Frontend: React, Next.js
AI & Automation: Claude Code, n8n, LLM APIs, AI Workflow Automation
Tools: Git, Jira, Scrum
Languages Spoken: Spanish (Native), English (B2)

Certifications

- Claude Certified Architect – Foundations
- AWS Certified AI Practitioner
- Microsoft Certified: Azure AI Fundamentals
