Summary

Software Engineer with professional experience developing web and mobile applications, backend services, REST APIs, system integrations, and automation solutions. Hands-on experience with C#/.NET, Spring Boot, SQL Server, PostgreSQL, Docker, AWS, and CI/CD. Built and deployed software solutions across enterprise and internal business environments, with additional experience applying AI-powered automation to real-world workflows.

Education

Instituto Tecnológico de Tijuana, BS in Computer Systems Engineering – Tijuana, Mexico Aug 2021 – Dec 2025

Experience

Associate Software Engineer, ITJ – Tijuana, Mexico Mar 2026 –

- Develop server-side business logic and component-based user interfaces for enterprise client solutions, translating functional requirements into production-ready features.
- Contribute to an internal application built with Next.js, working across frontend and backend components to implement and refine application functionality.
- Write unit tests and validate changes before release, ensuring implementation meets acceptance criteria and quality standards.
- Leverage Claude Code and AI-assisted development workflows to accelerate implementation, generate boilerplate and tests, and review code changes.
- Collaborate with cross-functional teams in Agile/Scrum, participating throughout the software development lifecycle.

Software Developer Junior, RSI México – Tijuana, Mexico Apr 2025 – Mar 2026

- Developed full-stack web applications using C#, ASP.NET, and JavaScript, implementing backend services and responsive user interfaces.
- Designed AI-driven automation workflows using n8n, orchestrating API integrations and LLM-based logic to streamline business operations.
- Configured CI/CD pipelines using Bitbucket Pipelines, Jenkins, and PowerShell to automate C#/.NET deployments to IIS.
- Containerized and deployed backend services on VPS using Docker Compose, ensuring high availability and secure external access.
- Optimized service report generation workflows, reducing overall processing time by 90% through standardized data structures.

Software Development Intern, RSI México – Tijuana, Mexico July 2024 – Apr 2025

- Built and maintained internal web applications using ASP.NET, C#, and SQL Server supporting administrative and operational processes.
- Developed Android application features in Java, implementing functionality based on operational requirements.

Projects

Nido – Notes Full Stack App

- Designed and developed a full-stack application using Spring Boot, PostgreSQL, and React/TypeScript, implementing the data model and REST backend.
- Repository: github.com/EddieReynosoR/nido

Skills

Languages: C#, Java, Python, SQL, JavaScript, TypeScript

Backend: .NET, ASP.NET Core, Spring Boot, REST APIs, Clean Architecture

Databases: SQL Server, PostgreSQL

Cloud & DevOps: AWS, Docker, Linux, CI/CD, Jenkins, GitHub Actions

Frontend: React

AI & Automation: Claude Code, n8n, LLM APIs, AI Workflow Automation

Tools: Git, Jira, Scrum

Languages Spoken: English (B2)

Certifications

- Claude Certified Architect – Foundations
- AWS Certified AI Practitioner
- Microsoft Certified: Azure AI Fundamentals
